

Features

- **2V025 series:**
 1. Direct acting and normally closed type 2/2 way solenoid valve. Its high sensitivity allows it to change direction quickly
 2. The structure is small and compact , and valve body is made of brass which is heat resistance and the coil conforms to Class B classification.
- **2V130 and 250 series:**
 1. This 2/2 way diaphragm piloted solenoid valve has low energy consumption and large air flow .
 2. The starting pressure is low and the operational differential pressures < 0.05MPa.
 3. The valve body is made of brass which is heat resistance and the coil conforms to Class B classification . The seals are made of NBR.

***Note:**

2V025 series as Direct Acting, 2V130, 2V250 series as Pilot Operated
